

3-4-50: Chronic Disease Deaths in San Diego County—East Region, 2000-2010

3 Behaviors
contribute to
4 Chronic Diseases
that cause over
50 percent
of all deaths worldwide.

What is 3-4-50?

Chronic diseases are now the major cause of death and disability worldwide, having surpassed infectious diseases and injuries. This reflects a significant change in diet habits, physical activity levels, and tobacco use.

These chronic diseases are important to consider together because they are common causes of disability and death in San Diego County. They are also highly influenced by three unhealthy behaviors; behaviors that cause many cases of specified chronic conditions that are preventable.

3-4-50 in San Diego County—East Region

- From 2000 to 2010, the percent of all deaths due to chronic disease has decreased in the East Region and its Subregional Areas (SRAs), while the number of deaths have remained relatively stable.
- Overall, chronic disease death rates have decreased in the East Region and its SRAs from 2000 to 2010.
- Among the East Region SRAs, Laguna-Pine Valley had the highest percentage of deaths due to chronic disease in 2010.
- Among the East Region SRAs, Mountain Empire had the highest chronic disease death rate in 2010.
- Despite a decrease from 2000, chronic diseases accounted for 56% of all deaths in the East Region in 2010.
